The Intellectual Terrorist

I've decided to coin a new term. It's okay. Writers can do that. So can street kids, but when a writer does it, it's usually less vulgar. Anyway, here's the term: Intellectual Terrorist.

An Intellectual Terrorist refers to someone who uses intellectual arguments, which may or may not be accurate or complete, but seem to be so, in a manner that causes others to be fearful.

Compare to the antonym: Educator. An Educator simply presents the facts in a complete and understandable manner, and in a way that allows the student to develop viable responses with confidence.
